

Abhay Jain

Senior Backend Developer

✉ abhay.jain.cse11@itbhu.ac.in ☎ 9358161425 Bengaluru, India

🔗 github.com/abhayitbhu

Profile

Results-driven Senior Backend Developer with extensive experience in designing and implementing scalable, high-performance microservices. Proficient in Java (Spring Boot), Python (FastAPI, Flask), AWS, Redis, Kafka, MySQL, MongoDB, system architecture, API development, distributed systems, CI/CD pipelines, containerization, and cloud computing. Adept at optimizing system efficiency, ensuring high availability, and reducing latency. Passionate about problem-solving, performance tuning, and DevOps best practices.

Professional Experience

Backend Developer | Decentro Tech Pvt Ltd *April 2025 – June 2026* Bengaluru

- Built Beacon service for GST and MCA Director details extraction; implemented GST and Director email processors for efficient data handling and validation.
- Integrated multiple third-party providers: EasyGo (DND), ZOOP, SIGNZY (PAN validation), MCA scraping (CIN validation), Shiprocket (address validation), Truecaller (for OmniScore calculation).
- Led development and client deployment of Decentro's CKYC module, interfacing with CERSAI registry for identity search (verify) and OTP-based download (fetch KYC records).
- Designed bulk CKYC flows for individuals and legal entities: SFTP uploads, response processing, callback notifications, metering, entitlement checks, and optional license validation.
- Utilized OpenSearch, Redis, MySQL, MongoDB, AWS Lambda, EC2, S3, Docker, Flask, and FastAPI to build scalable serverless and containerized services.

Senior Backend Developer | Savein.money *August 2024 – February 2025* Gurugram

- Spearheaded backend development for Wellup, a health and wellness platform.
- Implemented JWT-based authentication and authorization, and role-based access control (RBAC) to enhance security and compliance.
- Designed and integrated RESTful APIs, ensuring seamless communication between frontend and back-end services.
- Developed microservices architecture using Spring Boot.
- Optimized SQL queries and indexing strategies, enhancing MySQL database performance.
- Deployed services on AWS EC2, and managed logs using AWS CloudWatch.
- Created and managed cron jobs for various notification systems, ensuring timely and automated alerts and updates.

Backend Developer | Paytm *February 2023 – August 2024* Noida

- Developed a machine learning model deployment infrastructure, reducing latency by 40% using Python FastAPI.
- Built and optimized OCR applications for Aadhaar/PAN document extraction, ensuring 99.9% accuracy.
- Created a Face Match API using AWS Rekognition, improving KYC verification success rate by 25%.
- Designed and implemented asynchronous task processing pipelines with Kafka and Redis, enhancing system throughput.

- Integrated real-time monitoring and alerting systems using Grafana and Prometheus.
- Implemented CI/CD pipelines using Docker, Kubernetes, and Jenkins, accelerating release cycles.

Founder | Savin Innovation Labs Pvt Ltd *November 2022 – February 2023* Noida

- Developed a B2B SaaS-based billing system for a US diamond wholesaler, automating memo/bill transactions and reducing manual effort.
- Designed a responsive UI/UX using Figma, ensuring an intuitive user experience.
- Architected a scalable cloud-native solution using MEAN stack, Kafka, MySQL, and deployed it on AWS ECS.

SDE II | WECP Pvt Ltd *January 2022 – November 2022* Bangalore

- Led product management and full-stack development, integrating AWS, Node.js, Express, Angular, and Python for seamless system operations.
- Spearheaded innovative problem-solving techniques, driving measurable improvements in project success and team productivity.
- Integrated OpenAI APIs to dynamically generate customized questions based on user requirements, enhancing adaptive assessment capabilities.
- Utilized SonarQube to conduct code quality analysis on user submissions, ensuring adherence to best coding practices and maintainability standards.

Software Development Intern | Wooqr Pvt. Ltd. *May 2014 – July 2014* Bangalore

- Developed a Dropbox-like file storage application, improving file access efficiency.
- Won 1st Prize in Hackathon for developing an Android-based mobile comparison app.
- Created a mobile comparison application using Appery.io, enhancing user experience.

Civil Services Aspirant *July 2016 – January 2022*

- Gave 5 attempts of UPSC Civil Services Examination and cleared prelims all 5 times.

Projects

- **Jobs Auto Apply** — github.com/abhayitbhu/jobs-auto-apply
Multi-platform job-application automation tool (Python, Playwright) that searches, filters, and applies across Wellfound, Uplers, Naukri, Hrist, and Instahyre, auto-filling company ATS forms (Greenhouse, Lever, Workday). Answers recruiter screening questions via a layered engine combining saved memory, profile facts, RAG retrieval, and a local Ollama LLM with a verifier model for high-risk fields.
- Additional projects (Flutter app, Python data tooling, coding assignments) are available on my profile: github.com/abhayitbhu.

Education

Integrated Dual Degree in Computer Science

Indian Institute of Technology (BHU), Varanasi
Graduated with honours, CGPA: 7.64/10

June 2011 – June 2016

Publications

A Smart Gym Framework: Theoretical Approach

2015 IEEE International Symposium on Nanoelectronic and Information Systems

December 2015

Achievements

- Ranked in the Top 0.6% in IIT JEE 2011 (500,000+ candidates).
- Secured Top 0.3% in AIEEE 2011 (1.2 million+ candidates).
- Articles published in Kashmir Times & The News, covering technology, innovation and politics.

Technical Skills

- **Programming Languages:** Java (Spring Boot), Python (FastAPI, Flask), JavaScript (Node.js, Angular)
- **Frameworks & Tools:** Spring Boot, FastAPI, Flask, MEAN Stack, Docker, Kubernetes, Jenkins, Figma
- **Databases & Messaging:** MySQL, MongoDB, Redis, Kafka, OpenSearch
- **Cloud & DevOps:** AWS (EC2, ECS, Lambda, S3, CloudWatch, Rekognition), Grafana, Prometheus, CI/CD
- **Other:** RESTful APIs, Microservices, JWT/RBAC, OCR, Face Recognition, OpenAI APIs, SonarQube, CKYC/CERSAI Integration, Third-Party APIs (SIGNZY, ZOOP, Truecaller, Shiprocket, EasyGo)
